Professional Summary

PG-DBDA professional with a B.Tech. in Computer Science Engineering and hands-on experience in Python, SQL, Machine Learning, Data Analytics, ETL, and Big Data. Experienced in EDA, data preprocessing, feature engineering, predictive modeling, and LLM-powered data analysis using Ollama.

Projects

- **Automated Data Preprocessing and EDA Tool**
 - Developed a Python-based data preprocessing and exploratory data analysis tool to automate dataset profiling, statistical analysis, visualization, and data cleaning workflows.
 - Implemented dataset profiling to identify shape, data types, missing values, duplicate records, and numerical feature statistics including mean, median, standard deviation, skewness, and quartiles.
 - Automated visualization selection using an LLM API based on dataset column data types and generated visualizations including histograms, boxplots, bar charts, scatter plots, and correlation heatmaps.
 - Implemented preprocessing workflows for missing-value imputation, data-type conversion, and outlier detection using IQR and Z-score methods with options to remove or cap outliers.
 - Generated a cleaned and transformed CSV dataset for downstream data analysis and machine learning workflows.
- **Real Estate Investment Opportunity Scorer – ETL Pipeline**
 - Designed a reusable ETL pipeline to extract, clean, transform, validate, and prepare housing datasets for machine learning.
 - Automated preprocessing using Python and Pandas, including missing-value handling, duplicate removal, data-type correction, and categorical encoding.
 - Applied feature engineering and data transformation to prepare datasets for house price prediction.
 - Performed EDA to identify outliers, feature distributions, correlations, and factors influencing housing prices.
 - Implemented data validation checks to improve dataset quality, consistency, and reliability before model training.

Technical Skills

- **Programming:** Python, SQL, JavaScript
- **Generative AI:** Large Language Models (LLMs), Ollama, Prompt Engineering, Conversational AI
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Tree, Random Forest, Naive Bayes, KNN, SVM, K-Means, PCA, Feature Engineering, Model Evaluation
- **Data Analytics:** Data Cleaning, Data Preprocessing, EDA, Statistical Analysis, Data Visualization, Outlier Detection, Predictive Analytics
- **Deep Learning and Computer Vision:** Tensorflow, OpenCV
- **Data Engineering:** ETL, Data Validation, Data Transformation, PySpark, Apache Airflow
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools and Cloud:** AWS (S3, RDS, EC2, Lambda), Git, GitHub, Linux, Docker, Jupyter Notebook, VS Code, Tableau, Excel, Jira

Education

- **Centre for Development of Advanced Computing (CDAC), Bengaluru**
Post Graduate Diploma in Big Data Analytics (PG-DBDA)
- **Mahakal Institute of Technology, Ujjain**
Bachelor of Technology (Computer Science Engineering)

Certifications

- SQL (Basic) - HackerRank
- Python (Basic) - HackerRank

Languages

- Hindi
- English
