Professional Summary

Analytical and detail-oriented Data Analytics professional skilled in Python, SQL, Excel, Pandas, and data visualization. Experienced in data cleaning, analysis, identifying trends and patterns, and generating actionable business insights to support data-driven decision-making.

Projects

- **Automated Data Preprocessing and EDA Tool** *Aug 2026 – Present*
github.com/karmanshi/data-preprocessor-automated
 - Developed a Python-based data preprocessing and exploratory data analysis tool to automate dataset profiling, statistical analysis, visualization, and data cleaning workflows.
 - Implemented dataset profiling to identify shape, data types, missing values, duplicate records, and numerical feature statistics including mean, median, standard deviation, skewness, and quartiles.
 - Automated visualization selection using an LLM API based on dataset column data types and generated graphs including histograms, boxplots, bar charts, scatter plots, and correlation heatmaps.
 - Implemented preprocessing workflows for missing-value imputation, data-type conversion, and outlier detection using IQR and Z-score methods with options to remove or cap outliers.
 - Generated a cleaned and transformed CSV dataset for downstream data analysis and machine learning workflows.
- **AI-Powered Job-Specific Resume and Cover Letter Generator** *June 2026 – Aug 2026*
 - Built an AI-powered resume and cover letter generator using Flask, Ollama (Gemma), and LaTeX that tailors a candidate's master profile to a specific job description in real time.
 - Designed a hallucination-safe content pipeline where the LLM selects and rephrases only pre-existing profile data via ID-based references, with server-side validation rejecting any fabricated content.
 - Implemented an ATS compatibility scorer using sentence-transformers to compute JD-resume similarity via cosine similarity, showing measurable improvement between generic and tailored resumes.
 - Engineered LaTeX resume generation with strict ATS-safe formatting (single-column, ligature-safe, parser-verified via pdftotext) and JSON-based storage with atomic writes.

Technical Skills

- **Languages:** Python, SQL
- **Databases:** MySQL, PostgreSQL
- **Data Analysis :** Numpy, Pandas, Matplotlib, Seaborn, EDA, Preprocessing, Excel
- **Tools:** Git/GitHub, Jupyter Notebook, Tableau

Education

- **Centre for Development of Advanced Computing (CDAC), Bengaluru** *Feb 2026 – Aug 2026*
Post Graduate Diploma in Big Data Analytics (PG-DBDA)
- **Mahakal Institute of Technology, Ujjain**
Bachelor of Technology (Computer Science Engineering)

Certifications

- Generative AI Fundamentals – Databricks
- SQL - HackerRank
- Python - HackerRank

Languages

- English
- Hindi
